

ALLIED HEALTH RISK MANAGEMENT SERVICES

P E N D U L U M
RISK MANAGEMENT SERVICES

What defines allied health?

Broadly, the Association of Schools of Allied Health Professions (ASAHP) defines allied health “as those health professions that are distinct from medicine and nursing.” More specifically, allied health providers represent 60 percent of all health care providers.

How do your allied health insureds handle risk? Do they know the areas of high risk for their specialty? Pendulum, the leader in risk management consulting, has many expert risk control consultants available for the allied health sector.

Pendulum has provided risk management services to many allied insureds including, but not limited to:

- Addiction/Substance Abuse
- Ambulance/Non-medical Transportation Services
- Child and Family Case Services
- Clinics
- Correctional Facilities
- Foster Care/Adoption
- Genetics Laboratories
- Home Health/Hospice
- Medi-spas
- Pharmacy Services

Risk management services available include on-location consulting in the form of a traditional risk assessment or a focused review of an area in need. Desk-based work is also available for policy and procedure review or process overview. On-site and webinar training is available as well.

The Pendulum Allied Health Risk Management Resource Center is also available to help your insureds with resources that cover all aspects of risk management.

Call or email us today to find out how Pendulum can help your allied health insureds balance their risk and defensibility.
